**PROFILE**

Senior full-stack developer with exceptional programming ability and a strong foundation in software architecture and system design. Builds production systems from the ground up and scales existing platforms with precision and depth. Combines deep experience with open-source tooling, CI/CD workflows, and cloud infrastructure to deliver reliable, performant services. Proven leader across multiple concurrent service lifecycles and performance-critical operations.

**EMPLOYMENT HISTORY**

**Senior Fullstack Developer & Founding Engineer at caseflow.gr**

*Athens, Greece* January 2026 — Present

As a founding engineer, the position requires forward thinking, and a shift in mentality towards delivering the best possible UX, as soon in the developing cycle as possible.

Designing and leading the development of multiple MVP features, UX workflows, microservices and examining potential of third-party integration candidates. Furthermore, deciding on the development direction of the entire team towards the company's business goals and velocity projections.

**Senior Fullstack Developer & Squad Lead at Wise Pelican LLC.**

*Scottsdale, Arizona* August 2024 — December 2025

Responsibilities include defining the direction of the team's primary service, conducting PR reviews, designing solutions aligned with the strategic vision, building features, and mentoring squad members.

Designed and led the development of multiple services, including AI agent driven marketing asset generation based on openAI agent TS/JS SDK and on-demand creation of printable PDF documents, using an in-house built PDF rendering engine based on @hopding/pdf-lib.

**Backend Developer at Wise Pelican LLC.**

*Scottsdale, Arizona* March 2023 — August 2024

Contributed to daily feature development of the core application (web app es-hop) as well as in a series of microservices that complement the marketing vision and operating scope of the company and the core application.

**DevOps Engineer at Wise Pelican LLC.**

*Scottsdale, Arizona* September 2021 — March 2023

Managed system-wide implementations and ensured seamless production operations. Responsibilities included administering large-scale Parse Server/Dashboard instances, managing AWS infrastructures across diverse services, maintaining and seeding MongoDB. Designed and administered HubSpot integration as a CRM for 20+ CS roles.

**EDUCATION**

**Bachelor's, Computer Science**

*Czech University of Life Sciences Prague, Prague* September 2016 — June 2020
